React Native Push Element in Array Example - MyWebtuts.com

```
const MyWebtutsComponent = () => {  
  const myObjArray = [  
    {id: 1, name: "Dharmik" },  
    {id: 2, name: "Bhavesh" },  
    {id: 3, name: "Piyush" }  
  ];  
  
  myObjArray.push({id: 4, name: "Mehul"});  
  
  console.log(myObjArray);  
  
  return (  
    <View>  
      </View>  
  );  
};
```

Hi Dev,

object to array in react native. i would like to show you react native add object to array. So, let's follow few step to create example of react native add value to array.

Here, i will give you three simple example to adding key value in array with node. so, let's see bellow example how to push object in array in react native app.

Example: 1

```
import React, { Component } from "react";
import {View} from 'react-native';

const MyWebtutsComponent = () => {

  const myArray = [1, 2, 3, 4, 5, 6];

  myArray.push(7);

  console.log(myArray);

  return (
    <View>
    </View>
  );
};
```

Output

```
Array [  
  1,  
  2,  
  3,  
  4,  
  5,  
  6,  
  7,  
]
```

Example: 2

```
import React, { Component } from "react";  
import {View} from 'react-native';  
  
const MyWebtutsComponent = () => {  
  
  const myObjArray = [  
    {id: 1, name: "Dharmik" },  
    {id: 2, name: "Bhavesh" },  
    {id: 3, name: "Piyush" }  
  ];  
  
  myObjArray.push({id: 4, name: "Mehul"});  
  
  console.log(myObjArray);  
  
  return (  
    <View>  
    <View>  
  );  
};  
  
export default MyWebtutsComponent;
```

Output

```
Array [  
  Object {  
    "id": 1,  
    "name": "Dharmik",  
  },  
  Object {  
    "id": 2,  
    "name": "Bhavesh",  
  },  
  Object {  
    "id": 3,  
    "name": "Piyush",  
  },  
  Object {  
    "id": 4,  
    "name": "Mehul",  
  },  
]
```

```
    "id": 4,  
    "name": "Mehul",  
  },  
]
```

Example: 3

```
import React, { Component } from "react";  
import {View} from 'react-native';  
  
const MyWebtutsComponent = () => {  
  
  const myObjArray = [  
    {id: 1, name: "Dharmik" },  
    {id: 2, name: "Bhaves" },  
    {id: 3, name: "Piyush" }  
  ];  
  
  myObjArray.unshift({id: 4, name: "Mehul"});  
  
  console.log(myObjArray);  
  
  return (  
    <View>  
    <View>  
  );  
};  
  
export default MyWebtutsComponent;
```

Output

```
Array [  
  Object {  
    "id": 4,  
    "name": "Mehul",  
  },  
  Object {  
    "id": 1,  
    "name": "Dharmik",  
  },  
  Object {  
    "id": 2,  
    "name": "Bhaves",  
  },  
  Object {  
    "id": 3,  
    "name": "Piyush",  
  },  
]
```
